

PROFESSIONAL SUMMARY

I am a graduate of a software development apprenticeship looking for opportunities to continue my professional growth in the tech industry. During my apprenticeship, I gained hands-on experience building React applications and working on platform architecture within a DevOps project. I developed solutions using Microsoft 365, including building Power Apps and leveraging Power Automate to streamline and improve business processes. Having the opportunity to work in a consultancy environment, integrating with various teams on exciting projects, all while utilizing Agile methodologies to ensure effective and efficient project delivery. I have gained practical experience in all facets of the software development lifecycle. Including building full stack applications. I have a strong knowledge of SEO strategies and Accessibility guidelines. I am motivated to embark on the next phase of my career; I am actively seeking a role where I can apply and expand upon my current skill set.

WORK HISTORY
